## Summary

Full Stack Software Engineer experienced in designing and developing scalable software solutions, enterprise applications, and client-focused platforms. Strong foundation in software architecture, backend development, database design, API development, and problem-solving, with a focus on building reliable, maintainable, and efficient systems.

## Experience

**Freelance Developer** Jun 2024 – Present
*Independent · Freelance* *Remote*

- Develop and maintain three client platforms: **EduSolutions UAE**, **SkinSnugs**, and **Reconnect**, handling features, bugs, integrations, and deployment.
- Delivered **40+ freelance projects and tasks**, including **20+ Fiverr projects**; achieved **Fiverr Level 2 Seller** status with **3 repeat clients**.
- Fixed Kroger API integration bugs and resolved healthcare platform authorization and synchronization issues.

**Full Stack Developer** Oct 2025 – Jun 2026
*Promtech* *Lahore, Pakistan*

- Developed HR & Payroll and Fixed Assets systems covering attendance, leaves, recruitment, appraisals, duty rosters, employee life cycle, and accounting integration.
- Migrated **600+ employee records** and **4 years of historical data**; developed **40+ SQL reports**
- Built Employee Self-Service (ESS) modules and integrated DevExpress reporting interfaces.

**Intern** Jul 2025 – Sep 2025
*Promtech* *Lahore, Pakistan*

- Developed **25+ HR & Payroll reports** and validated against data from 200+ employees.
- Built frontend interfaces for listing and master-detail reports to improve reporting usability.
- Restructured payroll schemas to support configurable earnings and deductions as part of the HR & Payroll database redesign.

**Lead Teaching Assistant** Sep 2024 – Jun 2026
*Department of Computer Science, UET Lahore* *Lahore, Pakistan*

- Mentored **400+ students across 8 sections** in Programming Fundamentals and Object-Oriented Programming.
- Led and coordinated Teaching Assistant teams of **20 and 26+ TAs** across multiple teaching terms.
- Delivered lectures, conducted lab sessions, and guided students in programming, debugging, and problem-solving.

## Education

**University of Engineering and Technology, Lahore** Sep 2023 – Present
*Bachelor of Science in Computer Science (CGPA: 3.24/4)* *Lahore, Pakistan*

## Projects

**SERP – Multi-Tenant Workforce Management Platform** Jun 2026 – Present

- *Tech Stack:* Node.js, Express, PostgreSQL, Prisma ORM, Next.js, TypeScript, TanStack Query, Cloudflare R2.
- Leading backend development and contributing to requirements gathering for an enterprise multi-tenant workforce platform serving multiple companies, designed for 2,000+ personnel.
- Designed a PostgreSQL schema comprising 50+ tables and architected REST APIs for employees, clients, contracts, deployments, attendance, and assets.
- Implemented company-level data isolation and role-based access control with per-module permissions and site-level restrictions.
- Secured APIs with authentication, validation, and rate limiting; improved performance with company-aware caching and built document management on Cloudflare R2.
- Built frontend admin and company workspaces with company switching and permission-driven screens.

**AgentHR – Multi-Agent AI-Powered HR Management System** Oct 2026 – Present

- Developing a conversational HR management platform that enables employees and HR teams to access HR information and interact with HR workflows through natural-language requests.
- Designing a multi-agent architecture with a coordinating agent and specialized agents for HR operations, enabling task routing and coordinated workflow execution.
- Designing permission-aware agent workflows to retrieve HR information and coordinate operations while respecting user access controls.

**Forever – Full-Stack E-Commerce Platform** — Node.js, Express.js, MongoDB, React Jan 2025 – May 2025

- Built and deployed a full-stack e-commerce platform with separate customer storefront and admin dashboard, backed by RESTful APIs.
- Implemented JWT authentication and role-based access control for customer and administrator workflows.
- Integrated Stripe for online payments, cash on delivery, and Cloudinary for product image management.
- Developed inventory management and order tracking features to support end-to-end order processing.

**KiteDB: NoSQL Database Management System** — Python, Flask, TCP/IP Mar 2025 – May 2025

- Built a lightweight NoSQL DBMS supporting JSON document storage with custom B-tree indexing, write-ahead logging (WAL) for atomic transactions, and ACL-based security.
- Developed a multi-threaded TCP server to handle concurrent client requests with a custom query processor for complex JSON operations.
- Implemented persistence layer with crash recovery, achieving reliable data storage and retrieval for 10,000+ documents.

**Xzamine: Legal Content Checker** — Python, Flask, LLMs, Browser Extension Mar 2025 – May 2025

- Created browser extension for X (Twitter) that analyzes post compliance with Pakistan's PECA-2016 law using Flask backend.
- Integrated ChatOpenAI and Gemma3 models for automated content legality analysis with structured compliance reporting.

**AI Hate Speech Detection** — Python, PyTorch, BERT, Transformers Apr 2025 – May 2025

- Fine-tuned bert-base-uncased model on 42k balanced dataset (Davidson + HateXplain) to classify hate speech, offensive language, and neutral content.
- Achieved 0.89 weighted F1-score and accuracy using AdamW optimizer with learning rate scheduling.
- Preprocessed data with cleaning, class balancing, and tokenization for production-ready content moderation.

**POS System** — C#, .NET, SQL Server, WinForms Oct 2024 – Dec 2024

- Developed role-based billing system (Admin/Employee/Customer) with SQL transaction management for products, users, and orders.
- Implemented hybrid storage: SQL Server for customer data, file-based persistence for employee records.
- Created both WinForms and console interfaces for flexible deployment.

## Skills

**Programming Languages:** C++, C#, Python, JavaScript, TypeScript, SQL

**Software Development:** OOP, Data Structures & Algorithms, Debugging, Software Engineering

**Backend Development:** Node.js, Express.js, ASP.NET Core, ASP.NET MVC, REST APIs

**Frontend Development:** React, Next.js, HTML, CSS, Tailwind CSS

**Databases & ERP:** SQL Server, PostgreSQL, MongoDB, SQLite, Database Design, ERP Systems

**Tools & Technologies:** Prisma ORM, Git, GitHub, Linux, Postman, DevExpress

## Leadership & Extracurricular

**Coding Competition Lead** ITEC-2025

*UET Lahore*

- Prepared and tested coding problems; assisted participants with registration and coordination.
- Collaborated with organizing team to successfully manage and execute the competition.

**Technical Co-Lead** DevConnect On Campus

*UET Lahore*

- Managed and maintained event website; handled social media activities to engage participants.
