Summary

Backend-Focused Full Stack Software Engineer with experience building enterprise HR systems, multi-tenant platforms, and client-focused applications. Skilled in backend development, API design, requirements gathering, database engineering, and AI-powered feature integration, with hands-on experience across .NET, Node.js, Python, and SQL-based systems.

Experience

Freelance Developer Jun 2024 – Present
Self Employed *Remote*

- Develop and maintain three client platforms: **EduSolutions UAE**, **SkinSnugs**, and **Reconnect**, handling features, bugs, integrations, and deployment.
- Delivered **40+ freelance projects and tasks**, including **20+ Fiverr projects**; achieved **Fiverr Level 2 Seller** status with **3 repeat clients**.
- Optimized a grocery API integration, reducing 200-item transfers from 150+ to 25 seconds and repeat transfers to approximate 2 seconds through parallel requests, deduplication, and caching.

Full Stack Developer Oct 2025 – Jun 2026
Promtech *Lahore, Pakistan*

- Developed and enhanced HR & Payroll and Fixed Assets modules covering attendance, leaves, recruitment, appraisals, duty rosters, employee lifecycle, and accounting integration.
- Migrated **600+ employee records** and **4 years of historical data**; developed **40+ SQL reports**
- Built Employee Self-Service (ESS) system and integrated DevExpress reporting interfaces.

Intern Jul 2025 – Sep 2025
Promtech *Lahore, Pakistan*

- Developed HR & Payroll reports and validated report outputs against data from 200+ employees.
- Built frontend interfaces for listing and master-detail reports to improve reporting usability.
- Redesigned HR & Payroll database schemas to support attendance, leave management, recruitment, employee lifecycle workflows, HR letters, system configurations, duty rosters, and configurable earnings and deductions.

Lead Teaching Assistant Sep 2024 – Jun 2026
Department of Computer Science, UET Lahore *Lahore, Pakistan*

- Mentored **400+ students across 8 sections** in Programming Fundamentals and Object-Oriented Programming.
- Led and coordinated Teaching Assistant teams of **20 and 26+ TAs** across multiple teaching terms.
- Delivered lectures, conducted lab sessions, and guided students in programming, debugging, and problem-solving.

Education

University of Engineering and Technology, Lahore Sep 2023 – Present
Bachelor of Science in Computer Science (CGPA: 3.24/4) *Lahore, Pakistan*

Projects

SERP – Multi-Tenant Workforce Management Platform Jun 2026 – Present

- *Tech Stack:* Node.js, Express, PostgreSQL, Prisma ORM, Next.js, TypeScript, TanStack Query, Cloudflare R2.
- Leading backend development and contributing to requirements gathering for an enterprise multi-tenant workforce platform serving multiple companies.
- Designed a PostgreSQL schema comprising 50+ tables and architected REST APIs for employees, clients, contracts, deployments, attendance, and assets.
- Implemented company-level data isolation and role-based access control with per-module permissions and site-level restrictions.
- Secured APIs with authentication, validation, and rate limiting; improved performance with company-aware caching and built document management on Cloudflare R2.
- Built frontend admin and company workspaces with company switching and permission-driven screens.

EduSolutionsUAE - KHDA Evidence Generator — React, TS, Node.js, Supabase Feb 2026 – Present

- Developed backend functionality and implemented role-based access control (RBAC) for organization, administrator, and student roles.
- Implemented trial access functionality to support controlled platform usage for prospective users.
- Integrated and fixed AI-powered evidence generation features, making them functional within the application.
- Redesigned the frontend with a dedicated homepage, improved form layouts, and refined evidence formatting; currently maintaining and improving the platform.

AgentHR – Multi-Agent AI-Powered HR Management System Oct 2026 – Present

- Developing a conversational HR platform for natural-language access to HR information and workflows.
- Defining a multi-agent architecture to route requests and coordinate specialized HR agents.
- Designing role-aware agent workflows to enforce permissions when accessing HR data.
- Specifying approval workflows for sensitive HR operations to ensure authorized human oversight.

KiteDB: NoSQL Database Management System — Python, Flask, TCP/IP Mar 2025 – May 2025

- Built a lightweight NoSQL DBMS supporting JSON document storage with custom B-tree indexing, write-ahead logging (WAL) for atomic transactions, and ACL-based security.
- Developed a multi-threaded TCP server to handle concurrent client requests with a custom query processor for complex JSON operations.
- Implemented a custom query language with schema validation, nested-field queries, and logical and comparison operators for flexible JSON document retrieval.
- Implemented persistence layer with crash recovery, achieving reliable data storage and retrieval for 10,000+ documents.

Xzamine: Legal Content Checker — Python, Flask, LLMs, Browser Extension Mar 2025 – May 2025

- Developed a Chrome extension for X (Twitter) that analyzes posts for sentiment and potential compliance issues under Pakistan's PECA 2016.
- Integrated Gemma3 via Ollama and GPT-4o-mini via OpenAI API for AI-powered sentiment and legal compliance analysis.
- Implemented asynchronous detailed analysis using Celery and Redis, with task polling to retrieve analysis results.
- Generated structured compliance reports featuring sentiment confidence, PECA category probabilities, toxicity scores, cultural context, and legal rationale.

Forever – Full-Stack E-Commerce Platform — Node.js, Express.js, MongoDB, React Jan 2025 – May 2025

- Built and deployed a full-stack e-commerce platform with separate customer storefront and admin dashboard, backed by RESTful APIs.
- Implemented JWT authentication and role-based access control for customer and administrator workflows.
- Integrated Stripe for online payments, cash on delivery, and Cloudinary for product image management.
- Developed inventory management and order tracking features to support end-to-end order processing.

Skills

Programming Languages: C#, Python, JavaScript, TypeScript, SQL

Backend: ASP.NET MVC, ASP.NET Web API, Node.js, Express.js, FastAPI

Frontend: React, Next.js, HTML, CSS, Tailwind CSS

Databases & ORMs: SQL Server, PostgreSQL, MongoDB, Prisma, Dapper

Backend Concepts: REST API design, authentication & authorization, RBAC, multi-tenancy, API integration, caching, performance optimization

Tools & Technologies: Git/GitHub, Postman, Redis, Supabase, Cloudflare R2, DevExpress

Core Skills: OOP, DSA, debugging, requirements analysis, AI integration

Leadership & Extracurricular

Coding Competition Lead ITEC-2025

UET Lahore

- Prepared and tested coding problems; assisted participants with registration and coordination.
- Collaborated with organizing team to successfully manage and execute the competition.

Technical Co-Lead DevConnect On Campus

UET Lahore

- Managed and maintained event website; handled social media activities to engage participants.
